

# AMRISH THAKKAR

*Senior Technology Leader*

## PROFESSIONAL SUMMARY

Senior technology leader with 19+ years of experience driving cloud adoption, partner-led growth, and large-scale digital transformation across enterprise environments. Proven ability to lead global, cross-functional teams, build scalable cloud practices, and deliver secure, high-impact solutions that accelerate go-to-market execution and revenue growth. Extensive experience working with strategic partners, sales, and technical teams to develop joint business plans (JBPs), expand solution and product portfolios, and align technical capabilities with business objectives. Strong background in cloud platforms, distributed systems, and modern delivery models, with expertise in partner strategy, practice development, and customer success. Adept at engaging executive stakeholders, shaping multi-year strategies, and translating complex technical capabilities into measurable business outcomes, operational efficiency, and sustained market growth.

## EMPLOYMENT HISTORY

### SR. MANAGER, DIRECT & CHANNEL ENGINEERING

2022 - Present

*Amazon Web Services*

Dallas TX

- ◆ Manage product portfolio for a high-revenue (\$150M+) training and enablement product portfolio, aligning strategy with business goals and scalable delivery.
- ◆ Built and scaled high-performing **global** engineering teams (50+ builders across multiple charters) through hiring, mentorship, and succession planning.
- ◆ Improved time-to-market by ~20% YoY through modern SDLC practices, CI/CD adoption, and execution rigor.
- ◆ Implemented observability, reliability, and security best practices, improving uptime to 99.9% and reducing production incidents YoY.
- ◆ Partnered with **product, sales and business leaders** to align roadmaps with customer outcomes, improving NPS and adoption metrics.
- ◆ Drove dedicated go-to-market training strategy for AWS Channel Partners, including Systems Integrators (SIs) and Independent Software Vendors (ISVs).
- ◆ Co-owned strategic operational planning and long-term technical vision in close partnership with Product Management.
- ◆ Championed adoption of AI-assisted and **agentic workflows** and **Spec-Driven Development** across SDLC, accelerating coding velocity by 20% YoY.
